A decorative graphic on the left side of the slide. It features a cluster of approximately 12 speech bubbles in various colors (purple, pink, blue, teal, orange, green, light blue, red) arranged in a circular pattern. Below the bubbles are two silhouettes of people's heads and shoulders, facing each other as if in conversation. The background of the entire slide is split: the left half is white with a subtle texture, and the right half is a solid orange color.

on the Strategy

Definition of Coordination between behavioral and health

Is the practice of integrating mental health and physical health care to improve patient outcomes. This can include care coordination between primary care physicians and behavioral health providers.

How it Works

- **Education and Training**
- **Integrated care** -medical and behavioral health professionals/clinicians work together to address a patient's concerns.
- **Collaborative Care** -patients receive care from primary care team and mental health professional.
- **Care Coordination**- patient care activities are organized, and information is shared among all participants involved in a patient care.

Speaker Discussion Guide:

Please Share and Describe:

- Your Organization's current programs, services, or interventions related to **Behavioral Health's** goals and strategies.
- Trends you are seeing across SBC communities.
 - Describe which populations and regions of SBC.
- Barriers, challenges, needs that impact progress.
- Resources/assets that can support capacity and shared efforts.
